

Undergraduate Research with Prof. Jenkins

Undergrad, Lucas Wilkins, working in the glovebox.

Sophomores and Juniors looking for research credit? Starting early as an undergrad is highly encouraged, as research is a continuous learning experience. Come enjoy working in a hands on environment within a chemistry lab. Chem 200 acts as an intro course to working in the lab, prior to Chem 400 which requires a much more involved commitment that includes time in the lab as well as a written component. Prof. Jenkins only accepts a total of 3 undergraduates per semester, so if you are interested act fast!

Interested?!

- ✓ Check out the research online at <https://www.chem.utk.edu/jenkins/research.html>
- ✓ Pick a project you are excited about, Macrocyclic Tetracarbenes or Breathing MOFs
- ✓ Make sure you have taken or are co-enrolled in Organic 2 and lab (Chem 360/369)
- ✓ Email Prof. Jenkins (jenkins@ion.chem.utk.edu) to arrange a meeting to discuss joining the group!!

Undergrad, Khanh Pham, checking for crystal growth.
